

SEEING IS ACHIEVING.

Did you know 1 in 4 kids has a vision issue that could affect their ability to learn?

While your child's pediatrician or school nurse may do an annual vision screening, it's not the same as a thorough eye exam by a VSP® doctor. The VSP KidsCare Plan is designed to meet the eye care and eyewear needs of active and growing children by providing two WellVision Exams® and one pair of glasses every year.

HELP KEEP THEIR EYES HEALTHY.

- Vision problems left untreated can seriously impact learning, behavior, and overall development.
- Vision can change significantly during rapid physical development—even in as short a period as one year.
- Kids are prone to losing, damaging, and breaking their glasses, making additional pairs sometimes necessary. With this plan, kids are eligible for new glasses every year.
